jenny.collins@hemlow.com

Client:

Drayton Green Primary School, Ealing

Value:

£100,000.00

Description:

In conjunction with Ealing Council and their consultant we were appointed to modernise the Lower School Block, central heating pipework and radiator system.

The work included adhering to a strict programme and meeting budgetary requirements of the Client for the full replacement of all heating pipework and the installation of new low surface temperature radiant heating panels to provide a safe and comfortable environment throughout the Lower School Block.

All works were undertaken within tight time and financial constraints, over a school holiday period.

Hemlow completed the project by carrying out remedial building and decorative works including enclosing and painting of pipework throughout the school area.

Hemlow utilising their concept of a dedicated, single point of contact, project manager, ensured that all works were finalised in a professional and successful manner.

The project handover was to a very high standard, on time and in budget.
