**Client:**

Stockley Academy

**Consultant:**

Aecom

**Description:**

Stockley Academy has been officially recognised by the Specialist Schools and Academies Trust as one of the most improved schools in the country over a three year period. They have created an Academy where everyone is valued and respected and teach a wide variety of subjects both vocational and academic with a specialism in Science and Technology.

The property benefits from some of the latest HVAC equipment including a fully addressable BMS control system and thermodeck air conditioning.

We were awarded the Mechanical, Electrical and Public health planned maintenance contract for the academy in 2005 whilst the property was still in defect liability and our knowledge and expertise proved vital in overcoming some initial teething and operational problems.

Working closely with the academy facilities team and consultant has provided a level of understanding and provision that ensures the high standards and continual service levels, crucial to the successful operation of this modern air conditioned community.

We were delighted to be invited by the Academy to sponsor an annual award for their prize giving day. The photo shows one of our regional contracts manager's presenting a pupil with their trophy for outstanding sporting achievement.

The academy has recognised our ability to manage and maintain the complex systems coupled with our quick and efficient response to all emergency's and breakdowns and following a competitive retender process have been awarded a further termed contract.
