

Press release issued 13 December 2006

USE YOUR HIGHER RATE TAX ALLOWANCES FROM THE LAST 3 YEARS!

Most people have completed their tax forms for the last 3 years and assume they can no longer benefit from them....

... but think again... 5G Wealth Management can still make those 40% tax allowances work for you by taking advantage of a new environmental partnership investment which is actively encouraged by the Government.

The key points of this opportunity are:

- Investments in companies delivering research in to Greenhouse Gas Reducing opportunities in line with the Kyoto Protocol and other Government initiatives are eligible for special tax breaks.
- As a 40% tax payer you can claim back the previous 3 years allowance **and** the current year giving you a potential 160% Income Tax Refund.

Investors can for example:

- Invest £100,000 in to an eligible company.
- Reclaim the Green Income Tax Refund i.e. 4 years of tax at 40% = £160k payable in about 18 months times.
- You keep your original investment and receive a potential £100,000 per annum income from 2011.

5G Wealth Management can also arrange bridging loans for those investors who do not have the capital available to invest.

This investment is a win-win for everyone as Garry Williams, Managing Director at 5G Wealth Management states, "Most importantly this is the first time ever that an investment truly benefits everyone. It benefits the investor, the environment and potentially even Gordon Brown!"

The world cannot afford to wait before tackling climate change, the UK prime minister has warned.

A report by economist Sir Nicholas Stern suggests that global warming could shrink the global economy by 20%.

Tony Blair said the Stern Review showed the scientific evidence of global warming was "overwhelming" and its consequences "disastrous".

Chancellor Gordon Brown announced in his pre-budget report that the UK will invest £550m for green technology and initiatives to tackle climate change. This initiative is seen by HMRC (Inland Revenue) as a legitimate business investment as the areas of research bring a large commercial profit from which the future potential tax liabilities (2011 onwards) will be significantly greater than the initial tax refunds granted.

For individuals paying 40% tax and especially business owners **5G Wealth Management** offers a FREE FINANCIAL REVIEW to see if they qualify for the new **GREEN INVESTMENT with Tax benefits.**
